DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable sugars, and claims 7, 9-10, 12, 14, 38, 40-41, 51-59 and 62, drawn to an industrial isolated yeast strain of the fil phenotype classified in class 435, subclass 254.21.
- II. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable sugars, and claim 15, drawn to strain PVD1150=M5 fil1, classified in class 435, subclass 254.21.
- III. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable sugars, and claim 16, drawn to strain KL1=W303 fil2, classified in class 435, subclass 254.21.
- IV. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable sugars, and claim 17, drawn to strain FD51=HL86 fil300, classified in class 435, subclass 254.21.
- V. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable

Application/Control Number: 10/796,166

Art Unit: 1636

sugars, and claim 18, drawn to strain FDH16-22=HL822 fil300, classified in class 435, subclass 254.21.

Page 3

- VI. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable sugars, and claim 19, drawn to strain AT25=S47 fil400, classified in class 435, subclass 254.21.
- VII. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable sugars, and claim 20, drawn to strain AT28=S47 fil500, classified in class 435, subclass 254.21.
- VIII. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable sugars, and claim 21, drawn to strain AT251, classified in class 435, subclass 254.21.
- IX. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable sugars, and claim 22, drawn to strain AT252, classified in class 435, subclass 254.21.
- X. Claims 1-6, 42-50 and 60-61, drawn to a process for obtaining yeast strains conserving stress resistance in the presence of fermentable sugars, and claim 23, drawn to strain AT254, classified in class 435, subclass 254.21.

The inventions are distinct, each from each other for the following reasons:

Inventions I-X are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the same method can be used to obtain the different yeast strains. Although the yeast strains have the same general fil phenotype, they have different genotypes and characteristics that make them appealing for bread making. Any strain with the fil phenotype could be produced by this method.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michele K. Joike, Ph.D. whose telephone number is

571-272-5915. The examiner can normally be reached on M-F, 9:00-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Irem Yucel, Ph.D. can be reached on 571-272-0781. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
